## Executive Summary

This report presents the findings of a GDPR compliance scan conducted on **Not available** on **2025-05-11 19:54:58**. The scan identified a total of **13** instances of personally identifiable information (PII) with **3** high-risk items.

Scan Type	AI Model
Region	Europe/Netherlands
Date & Time	2025-05-11 19:54:58
Scanned URL/Domain	Not available
Total PII Items Found	13
High Risk Items	3
Medium Risk Items	9
Low Risk Items	1

## Risk Assessment

### GDPR Compliance Protection

Some risk of GDPR fines exists - address highlighted issues

Potential fines up to €20 million or 4% of global revenue

This scan has identified some high-risk PII items that should be addressed promptly to ensure ongoing GDPR compliance.

## Data Sustainability Compliance

Data sustainability measures how efficiently your organization manages personal data in compliance with GDPR principles of data minimization, storage limitation, and purpose limitation. A higher score indicates better long-term data governance practices.

## Detailed Findings

No detailed findings available.

## Recommendations & Next Steps

- Ensure you have proper legal basis for processing all identified PII.
- Document all processing activities as required by GDPR Article 30.
- Review data retention policies to ensure PII is not kept longer than necessary.
- Implement appropriate technical and organizational measures to secure PII.

### High-Risk Item Recommendations

- Conduct a Data Protection Impact Assessment (DPIA) for high-risk processing activities.
- Review and strengthen access controls for systems containing high-risk PII.
- Consider pseudonymization or encryption for high-risk data.
- Ensure processors handling this data have appropriate data processing agreements.
